## DETAILED ACTION

### ***Response to Arguments***

1. Applicant's arguments filed 11/16/2005, regarding claims 27,28 and 36 have been fully considered but they are not persuasive. The applicant asserts on page 18 that prior art Kurtin fails to disclose signals being continuously applied. The examiner disagrees and found that Kurtin discloses that during the course of an actual program, sounds are being continuously generated (column 4, lines 62-65).
2. Regarding claim 28, the examiner found prior art that read on "wherein the audio input signal is monaural and applied to each of the dual channels. Regarding claim 36, the examiner found prior art that read on "a delay amount which about equal in both of the dual channels".
3. The applicant agreed to an Examiner's amendment canceling claims 27-44. Claims 1-26 were cancelled already.
4. Claims 45-52 are the original claims 1-8. The examiner had previous deemed them allowable and they remain in allowable form.

## EXAMINER'S AMENDMENT

Authorization for this examiner's amendment was given in a telephone interview with the inventor, Robert Katz on 1/11/2005.

The claims are to be amended as follows:

**Claims 27-44: Cancel.**

***Allowable Subject Matter***

5. **Claims 45-52** are allowable.
6. The following is an examiner's statement of reasons for allowance: See above response to arguments.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
